

KOMFORTEX[®]
Elastic surfacing systems
for horse keeping

KOMFORTEX[®]

Makes horses feel better!

Makes horses feel better!

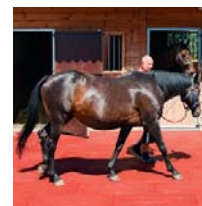

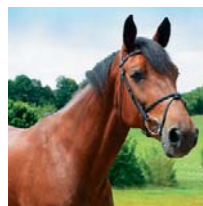

For the health and well-being of your horses

KOMFORTEX® surfacing systems are elastic and flexible, which means they protect hooves, tendons and joints in equal measure. With its non-slip surface the risk of accident is reduced, and protection from injury is increased. This helps the hoof structure to stay in good condition and leads to improved circulation as well as less frequent occurrence of lameness: Horses feel happy and stay healthy!

KOMFORTEX® surfacing systems are really easy to lay, meaning that anyone can do it at any time. Cleaning the floor is also uncomplicated – just spray it with water and/or sweep it with a brush.

The floor is hard-wearing, meaning that it has a long life span and is therefore highly economical. Its design also provides the best possible antislip: KOMFORTEX® joints and underside drainage prevent ponding and allows e.g. rainwater to drain when used outdoors.

KOMFORTEX®

Makes horses feel better!

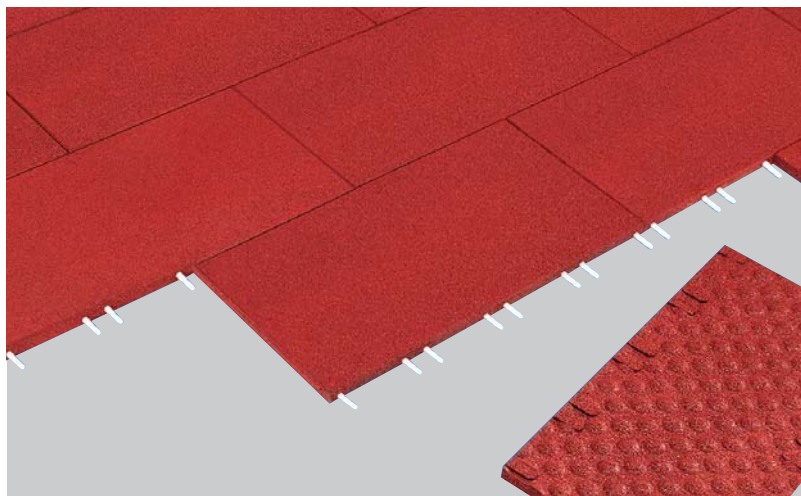

KOMFORTEX® – The benefits at a glance

- Offers a safe surface to walk on thanks to suitable softness and elasticity
- Prevents injuries
- Prevents rheumatic illnesses
- Provides insulation against heat and cold
- Is highly resistant to urine
- Can be easily laid at low cost
- Can be laid loose or to be glued to flooring below
- Can be easily cut to size with a saw
- Can be recycled
- Has underside drainage
- Is weather-proof and frost-proof
- Rubber recycling makes a positive contribution to our environment

KOMFORTEX®

KOMFORTEX® Elastic tile

The KOMFORTEX® elastic tile is THE top-quality solution for all horse owners. It is elastic, meaning that it is friendly to tendons and joints and reduces noise at the same time. The low-cost surfacing system is easy to look after. It is heavy duty yet has a long life span.

Areas of use

- Wall padding
- Wet areas
- Paddocks
- Stable walkways

Technical data

Material Rubber granulate
Colours red¹ green¹ black¹ grey¹

| Dimensions (mm) ³⁽²⁾ | Qty. required/(m ²) | Weight (kg) |
|---------------------------------|---------------------------------|--------------|
| 500 x 500 x 40 ³ | 4 | approx. 9,0 |
| 1.000 x 500 x 40 ³ | 2 | approx. 18,0 |

¹ Slight material-related colour variations possible

² Dimensional tolerances in accordance with DIN 7715, part 2, class M3

³ Each with suitable edge tiles and/or corner edge tiles 1000 x 250 mm or 1250 x 250 mm

Makes horses feel better!

KOMFORTEX® Elastic pavement blocks

KOMFORTEX® Paving block tile

Safety without compromise – guaranteed by the KOMFORTEX® elastic pavement blocks. The shock-absorbent surfacing system consists of typical pavement blocks and can be easily laid on asphalt and concrete.

Areas of use

- Stable walkways
- Entrances to riding areas
- Entrances to paddocks
- Hitching rails, washing bays

Technical data

Material Rubber granulate
Colours red¹ green¹ black¹ grey¹

| Dimensions (mm) ² | Qty. required | Weight (kg) |
|-----------------------------------|-------------------|--------------|
| Full blocks ca. 200 x 165 x 43 | 35/m ² | approx. 1,0 |
| Half blocks ca. 100 x 165 x 43 | 4/rm | approx. 0,50 |
| Starter blocks ca. 200 x 135 x 43 | 5/rm | approx. 0,95 |

The KOMFORTEX® paving block tile offers the ideal combination of design and functionality: It is warmer than hard stone, and of course pleasantly soft. And that means it offers excellent protection against injury to tendons and joints.

The combination of elastic pavement block and elastic paving block tile doesn't just sound good, it looks good too – and is low-cost as well as quick and easy to lay.

Areas of use

- See elastic pavement block and elastic paving block tile
- Edge tiles and corner edge tiles available as an accessory
