New remodelled ridinghalls, arenas & hypodrom at Kobilarna Lipica by ProEquus

Dear ProEquus, Mr. Laengle Joachim

We have held now the first tournaments on the riding arenas built with your products. To date, the result and the quality greatly exceeded our expectations. Recently the riding arenas performed perfectly, in spite of torrential rainfalls leading up to the events.

Riders and participants were full of praise, and commented that the new ProEquus arena footing is of the highest quality. These include Dr. Michele Toldo of Italy, Gabris Ladislav of Slovenia, and Dr. Erdmann of Team-Austria among other Officials.

We thank you again for the professional consultation, design/construction, and the perfect installation of our state of the art riding arenas. The new arenas at Lipica Stud Farm once again share the limelight with the few comparable world class riding facilities in existence. Since we have achieved the highest quality of riding arena footing using your ProEquus systems, so certified through out the first events, we meet FEI requirements, it is again possible to host FEI-Sanctioned CDI-W dressage and also 4* CSIO jumping competitions.

Your grateful and respectful client

Matjaz Pust
Director Lipica Stud Farm
