Requirements for equestrian flooring:

In dealing with horses responsibly, their health is your main concern. The old English saying: **'No hoof, no horse'** sums it up – legs and hooves are the most precious parts of a horse, and they need to be protected.

Whether a horse is involved in sports or recreation, the flooring that it moves on every day is most important. Long-term stress due to improper flooring can lead to serious harm and injuries, and shorten the performance horse's career.

While a surface that is too firm stresses the joints, a floor that is too soft puts a strain on the tendons. Wet and heavy surfaces can cause thrush, and dusty ones are bad for the lungs of the horse and rider.

Perfect grip + traction

Dust-free + mud-free, year-round

Resilient - slightly springy

Will not compact or deaden

Retains correct looseness

A surface that is too firm stresses the joints.

A surface that is too soft stresses the tendons.

A correctly engineered, designed and executed equestrian flooring system transfers the forces into the ground layers.

Drawing from years of experience in this area, ProEquus® provides customized solutions for perfect equestrian flooring systems.

ProEquus® is your partner for the construction and renovation of riding arenas as well as stables, open stables and paddocks, providing professional consulting and custom concepts.

All products available from ProEquus® are purchased directly from the genuine, original manufacturers.

No rotational restrictions of the hooves or tendons.

Concussion Eliminated.

Minimal leveling layer
(Rarely needed drainage layer)

PROEQUUS Components:

The correct sand type + size is absolutely critical.

Only the highest quality, correctly applied

PERFECT FOOTING
CLASSICAL EQUESTRIAN

Exactly correct

for your riding discipline/style.

What the experts say about ProEquus™ and Perfect Footing™ performance arena systems ...

Products used: ProEquus OT40™ + Perfect Footing™ + Sand Technologies.

The expert: Matjaz Pust, Obmann, Kobilarna Lipica (director, the state-owned Lipizzan Stud Farm since 1580)

Arenas: **FEI**-sanctioned CSIO 4* jumping, CDI A, N, and W classes of international dressage, for Nations Cup championship and international championship levels of competition.

Mr. Pust states:

To date, the result and the quality greatly exceeded our expectations. Recently the riding arenas performed perfectly, in spite of torrential rainfalls leading up to the events. Riders and participants were full of praise, and commented that the new ProEquus arena footing is of the highest quality. These include Dr. Michele Toldo of Italy, Gabris Ladislav of Slovenia, and Dr. Erdmann of Team-Austria among other Officials. We thank you again for the professional consultation, design/construction, and the perfect installation of our state of the art riding arenas. The new arenas at Lipica Stud Farm once again share the limelight with the few comparable world class riding facilities in existence. Since we have achieved the highest quality of riding arena footing using your ProEquus systems, so certified through out the first events, we meet FEI requirements, it is again possible to host **FEI**-Sanctioned CDI-W dressage and also 4* CSIO jumping competitions.

Your grateful and respectful client,

Matjaz Pust, Director, Lipica Stud Farm [\(... more\)](#)

Products used: Perfect Footing™ + Sand Technologies, on a structural base of porous/adamant lava stone.

The experts: The Chefs d' Equipe (coaches) of the top international teams participating in the 2009 Nations Cup.

Where & When: LINZ-Ebelsberg, Austria; May 2009

What: Live interviews of the international teams' Chefs d' Equipe (coaches), the Course Architect, and the Nations Cup Event Organizer. *The experts unanimously agree ...*

"My name is Michelle Grubb, and I am the Chef d' Equipe for the American riders here in Linz, Austria.

We had all kinds of weather. We had lots of rain ... for the American horses the footing is excellent, and I would recommend this footing very, very strongly for anyone who is looking for a great, all weather surface."

Michelle Grubb, Coach
Team-USA

Sönke Sönkesen - Chef d' Equipe, Team Germany:

"A world class perfect conditions hunter/jumping footing on CSIO 4* Linz Ebelsberg, by ProEquus.

This championship's footing is equal to - or better than - the finest footing in Germany."

Sönke Sönkesen (GER)

[\(Click for full interview\)](#)

Uliano Vezzani (ITA): "I am the Course Designer on this magnificent riding arena, and I have to say that the horses do jump here very very well.

"The reason is that the footing here is very elastic ... only if you are able to ride on a perfect footing like this - are the horses able to show their best results."

Uliano Vezzani (ITA)
(FEI Parcour Architect)

[\(Click for full interview\)](#)

"My name is Willi Melliger. I am here at the CSIO 4* in Linz, Austria, as the equipe chef of the Swiss National Team ... the footing here is excellent.

... We would be very happy, if we would always have such perfect riding footing to compete on."

Willi Melliger
Team-Switzerland

[\(Click for full interview\)](#)

"My name is Gabriele Morbitzer. I am the referent for the jumping team at the Austrian Riding Association ...

The footing is absolutely fantastic, and can be recommended without any doubts."

Gabriele Morbitzer (AUT)

[\(Click for full interview\)](#)

"Even if I include my active participation at the Olympic Games in Atlanta (1996). ... such elastic footing like this for the horses has never happened to me before."

"... Uliano Vezzani, had to build the jumps higher and higher, because there were so many zero faults."

Helmut Morbitzer (AUT)
(Nations Cup Organizer)

[\(Click for full interview\)](#)

Products used: HoofGrid™ + Perfect Footing™ + Sand Technologies

"... we decided to completely renovate the dressage riding plaza according to the recommendations of Mr. Längle, Pro Equus ... In wet weather or dry, the footing is always consistent with the same excellent properties..."

... A tournament in June through September 2005, CDN-A-Bregenz Mehrerau ["Competition Dresseur Nationale - A Klasse"] ... all participants highly praised it as a great success ... in the extremely intense rainfall in the flood disaster in autumn 2005 shown on the new surface had no effect. This was within 15 minutes after each Downpour back to 100% usable, which we obviously the quality of the whole again before our very eyes. With best regards and thanks for the advice, "Ing. Klaus Steurer, Chairman, Reitverein Kloster Mehrerau, Bregenz, Austria" [\(...more\)](#)
